The educational service of the museum aims to make culture accessible to young audiences. From nursery school to high school, children benefit from an adapted, lively and fun visit. With guides, they discover a profession, its gestures, but also its noises, smells and all the sensations associated with it.

Different tour options are available: simple guided tour, creative workshops, discovery workshops, game workshops... They cover specific and varied themes. It is up to you to make your choice!

In addition, in order to diversify the pleasures, the Pedagogical Service is developing visit modules linked to the temporary exhibitions organized at the museum.
